

DIPANSHU

B.Tech Student | AI/LLM Application Developer | Software Development

Phone: [Add phone] | Email: [Add email] | GitHub: [Add GitHub] | LinkedIn: [Add LinkedIn]

PROFILE

B.Tech 2nd-year student focused on building practical AI applications and strengthening software development fundamentals. Experienced with LLM APIs, structured outputs, prompt engineering, resume parsing, RAG concepts, and backend development. Currently building portfolio projects that combine AI with real-world workflows.

EDUCATION

B.Tech — [Branch]

[College Name]

Expected Graduation: [Year]

CGPA: [Add if desired]

TECHNICAL SKILLS

- **Languages:** Python, Java, C
- **AI/LLM:** LLM APIs, Groq, prompt engineering, structured outputs, Pydantic, ReAct, RAG concepts
- **Backend:** FastAPI, REST APIs, Python application development
- **Data / AI Infrastructure:** Qdrant, vector search concepts
- **Core CS:** Data Structures & Algorithms, programming fundamentals
- **Creative AI:** AI image/video generation, AI-assisted visual storytelling

PROJECTS

HireMeAI — AI Resume Chatbot

Building an AI-powered resume chatbot that allows users to interact with resume information through natural-language questions. Developed the backend using FastAPI and integrated LLM-based responses, with resume data as the core knowledge source.

AI Resume Parser

Built a resume-processing workflow that extracts structured candidate information and prepares it for downstream AI applications. Worked with structured data and LLM-based extraction.

AI Portfolio Challenge

Designed an AI portfolio concept using a structured candidate-profile schema with Pydantic and an LLM-powered recruiter-facing chat interface. Focused on grounded responses and preventing unsupported claims.

AI Engineer Learning Projects

Developed hands-on applications while learning LLM calls, system prompts, temperature, tokens, JSON/Pydantic outputs, prompt engineering, ReAct, prompt chaining, and streaming responses.

AI Video & Creative Media Projects

Experimented with generative AI workflows for images, videos, advertisements, cinematic concepts, and visual storytelling, combining creative direction with modern AI tools.

RELEVANT COURSEWORK / LEARNING

Data Structures & Algorithms • Object-Oriented Programming • Programming in C • Java Fundamentals • Python • AI/LLM Application Development • Backend Development

CURRENT FOCUS

Building real-world AI applications, improving DSA and programming fundamentals, and developing a portfolio of deployable projects around LLMs and AI agents.

ADDITIONAL

Open to internships, hackathons, collaborative software projects, and opportunities in AI engineering / software development.
